# North Carolina State Health Plan 2024 Custom Formulary

**Effective 10/01/2024**

Please talk to your provider about prescribing formulary medications, which may help reduce your out-of-pocket costs. This list can help guide you and your doctor in selecting an appropriate medication.

The comprehensive formulary document is regularly updated. Please visit the [Plan's website](#) for the most up-to-date information. This guide was current at the time of printing and is subject to change.

**To search** for a medication name within this PDF document, use the **Control** and **F** keys on your keyboard, or go to **Edit** in the drop-down menu and select **Find/Search**. Type in the word or phrase you are looking for and click on Search.

**USE CAUTION BEFORE PRINTING; LARGE CONTENT DOCUMENT!**

## Member Guide to Covered Medications on the Formulary

This guide lists the approved brand name and generic prescription medications that have been reviewed by the North Carolina State Health Plan (Plan). Please refer to this formulary guide for information about medications covered by this formulary and present this guide to your provider if you require a prescription.

The prescription medications listed in the formulary or their tier placement may change from time to time due to a change in the cost of the medication and/or in the classification of the medication by the U.S. Food and Drug Administration (FDA) or nationally recognized medication databases (e.g., Medi-Span). For a more complete listing of medication coverage and costs, you may use our drug [Lookup tools](#). You may also call CVS Caremark® Customer Service at 1-888-321-3124 to verify prescription medication benefits.

A formulary is a list of prescription medications covered by a health plan. The Plan's Pharmacy & Therapeutics (P&T) Committee reviews medications at least quarterly. This includes ongoing reviews of clinical information about new medications and reviews of new safety and efficacy information about older medications. The majority of the Plan's P&T Committee is composed of practicing prescribers and pharmacists independent of the Plan. Tier placement of prescription medications in the formulary may be determined by the effectiveness and safety of the medication, the cost of the medication, and/or the classification of the medications by the FDA or nationally recognized medication databases (e.g., Medi-Span).

Please refer to <https://www.shpnc.org> for detailed information regarding your pharmacy benefits, including out-of-pocket costs, prior authorization and step therapy medication requests, and applicable exclusions.

### Formulary Tiers

The Formulary covers most medications approved by the FDA, within existing benefits. The plan design determines the member's payment obligation.

Definitions for the Tiers are as follows:

**Tier 0:** Made up of zero-cost medications including Affordable Care Act (ACA) preventive medications, insulin, and preferred Blood Glucose Meters (BGMs).

**Tier 1:** Typically includes the most cost-effective of non-specialty prescription medications; most are generic though there are a few instances in which the branded product is more cost-effective. Also includes some generic oral antiretroviral and anti-rejection immunosuppressant medications.

**Tier 2:** Typically includes preferred brand non-specialty medications and some high-cost generics. Also includes some brand oral antiretroviral and anti-rejection immunosuppressant medications and preferred Continuous Glucose Monitors (CGMs) and associated supplies.

**Tier 3:** Typically includes non-preferred brands, including branded generics (also known as single source generics), non-specialty medications. Also includes some non-preferred brand oral antiretroviral medications. Excluded, non-specialty medications that are approved via the exceptions process also take a Tier 3 copay.

**Tier 4:** The most cost-effective specialty medications.

**Tier 5:** Preferred brand specialty medications.

**Tier 6:** Non-preferred brand specialty prescription medications. Excluded, specialty medications that are approved via the exceptions process also take a Tier 6 copay.

**Tier 7:** Preferred diabetic supplies and preferred Blood Glucose Meter (BGM) supplies.

### Pharmacy Benefit Cost-Share Compare by Plan

The grid below provides a summary of the 2024 Plan Year cost-share and unique copays for each of the Plans. Additional description for unique copays and reference to other resources is found in following pages within the guide.

<b>Formulary Tier or Unique Copay</b>	<b>80/20 Plan</b>	<b>70/30 Plan</b>	<b>High Deductible Health Plan</b>
<b>Tier 0</b>	<b>\$0</b>	<b>\$0</b>	<b>\$0</b>
<b>Tier 1</b>	\$5 copay per 30-day supply	\$16 copay per 30-day supply	50% after deductible
<b>Tier 2</b>	\$30 copay per 30-day supply	\$47 copay per 30-day supply	50% after deductible
<b>Tier 3</b>	Deductible/coinsurance	Deductible/coinsurance	50% after deductible
<b>Tier 4</b>	\$100 copay per 30-day supply	\$200 copay per 30-day supply	50% after deductible
<b>Tier 5</b>	\$250 copay per 30-day supply	\$350 copay per 30-day supply	50% after deductible
<b>Tier 6</b>	Deductible/coinsurance	Deductible/coinsurance	50% after deductible
<b>Tier 7</b>	\$5 copay per 30-day supply	\$10 copay per 30-day supply	50% after deductible
<b>HDHP Preventive Medications (PV)</b>	not applicable	not applicable	50% bypass deductible

## Generic Medications

**In most cases, choosing a generic medication equivalent, when available, may mean significant savings to you.** We encourage you to discuss with your provider whether a generic alternative is an available treatment option. Especially for medications that are taken daily and refilled frequently, you will experience the long-term savings of a lower medication payment month after month. **If you choose a brand name prescription medication and a generic equivalent is available, you may be subject to higher out-of-pocket expense.**

## Compounded Prescriptions

Compounded prescriptions contain two or more medications mixed together. Compounded prescriptions are processed according to member benefits. To be eligible for coverage, compounded medications must contain at least one ingredient that is defined as a prescription medication and must not be a copy of a commercially available product. Compounded medications may be subject to prior authorization and benefit exclusion.

## Utilization Management: Prior Authorization, Quantity Limitations and Step Therapy Medications

Certain medications may be subject to prior authorization, quantity limitations, or step therapy programs. The Plan's P&T Committee reviews and approves the clinical criteria for these programs.

- Medications that have prior authorization requirements must be reviewed by CVS Caremark for coverage determination before coverage can be authorized.
- Certain medications may also have limitations on the quantity and days' supply for coverage. Quantities in excess of the coverage limit must be reviewed and approved by CVS Caremark coverage determination before coverage can be authorized for amounts in excess of the limits.
- For coverage of step therapy medications, the Plan requires that the member has tried non-restricted formulary alternatives medications first. Coverage for step therapy medications may be provided without the use of a non-step therapy medication if the prescriber certifies in writing that the member has previously used non-restricted medications and the non-restricted medications have been detrimental to the member's health or have been ineffective in treating the same condition and, in the opinion of the prescriber, are likely to be detrimental to the member's health or ineffective in treating the condition in the future. Clinical rationale and documentation for exception requests may be required.

The FDA is responsible for approving medications for use based on clinical data proving the medication is safe and effective for that specific use. The Plan's utilization management programs follow FDA-approved uses for these medications. However, the Plan recognizes that in many cases, "off-label" (i.e., non-FDA approved) uses of prescription medications may be acceptable. In determining the acceptability of off label uses, the Plan utilizes several sources of clinical information including but not limited to:

1. Nationally recognized clinical references including American Hospital Formulary Service Medication Information
2. The results of at least two randomized, controlled clinical studies that support a specific off-label use, and that are published in peer-reviewed professional medical journals
3. Consultations with internal and external physician experts regarding community standards. Additional searches for current supporting medical literature may be performed utilizing standard electronic databases.

### **Specialty Medications**

These medications, as classified by the Plan, have unique uses, treat complex medical conditions, require special dosing or monitoring, are typically prescribed by a specialist provider and/or require special patient education, training or coordination of care. Most specialty medications can be found on Tier 6, but some may be found on lower specialty Tiers 4 or 5.

Specialty medications will need to be filled with CVS Specialty® pharmacy. These medications are identified in the specialty column of the formulary guide. Call the CVS Specialty customer service number at 1-800-237-2767 to determine the steps required to fill your specialty medication prescription.

### **Affordable Care Act**

Please note, some medications may have \$0 cost-sharing under the Affordable Care Act (ACA) for members enrolled in the 70/30, 80/20 or HDHP plans. These medications take Tier 0. Examples of categories of medications that may be subject to \$0 cost share include aspirin, breast cancer preventive, fluoride supplements, folic acid supplements, gonorrhea prophylaxis (newborn), iron supplements, tobacco cessation, vaccines, vitamin D supplements, and some contraceptive medications and devices. You may find additional information about these medications on the [ACA Preventive List](#). These medications are identified by the notation of "**ACA**" next to qualifying medications within the formulary guide. If you do not find the medication you are searching for, consult or contact CVS Caremark customer service at 1-888-321-3124 to find out if the medication is available over the counter or is covered under your medical and/or pharmacy benefit.

### **High Deductible Health Plan (HDHP) Preventive Medications**

For the High Deductible Health Plan some preventive medications used to prevent or manage certain health conditions are covered without meeting a deductible. Coinsurance will still apply. These medications are identified in the guide with a "**PV**" notation. Additional information about these medications can be found on the [HDHP Preventive Medication List](#).

## Insulin

The Plan will cover the full cost of insulin. This means that any covered insulin or insulin approved through the formulary exceptions (medical necessity) process will take Tier 0 and have a \$0 copay/coinsurance for members. Preferred insulin products are identified in the guide with a notation of “**\$0 copay per 30-day supply**”.

## Non-Covered Medications

The Plan has a custom closed formulary. In a “closed” formulary, certain drugs are not covered. This comprehensive formulary document notes drugs that are not covered by the Plan. This is applicable to the Traditional Pharmacy Benefit (which includes the 80/20 Plan and 70/30 Plan). Non-covered medications are designated in the formulary guide with an “**NC.**” A formulary exception process is available to support Plan members who, per their prescriber, have a medical necessity to remain on a non-covered drug. The exception process is administered by CVS Caremark, the Plan’s Pharmacy Benefit Manager.

## Medical Benefit Specialty Medications

Some specialty medications are covered under the medical benefit and are subject to office charges. These medications are usually administered by intramuscular injection or intravenous injection or infusion under provider supervision in an office, outpatient setting or through home infusion. Medical benefit specialty medications are designated in the formulary guide with an “**M.**” Members may obtain prior authorization, and providers may contact Blue Cross and Blue Shield of North Carolina Customer Service at 1-888-234-2416.

## Preferred Blood Glucose Monitoring and Diabetic Supplies

Diabetic testing supplies associated with the Plan’s preferred Blood Glucose Monitoring (BGM) systems take Tier 7 and will have a unique copay of \$5 per 30-day supply for the 80/20 Plan or \$10 per 30-day supply for the 70/30 Plan. This unique copay also applies to preferred insulin pens and syringes and lancets. It does not apply to Continuous Glucose Monitoring (CGM) products.

## Using the Member Guide to the Basic Formulary

The Medication List is organized into broad categories (e.g., ANALGESICS AND ANESTHETICS). The graphic below shows the information that is provided in each column of the medication list and is an example only. Please use the medication search function to find current information for medications on the medication list.

Drug Name	Drug Tier	Requirements/Limits
<b>ANALGESICS</b>		
<b><i>ANALGESICS, OTHER</i></b>		
OFIRMEV INJ 10MG/ML	1	PA
<b><i>ANESTHETICS PV</i></b>		
AMIDATE INJ 2MG/ML	4	PA, ST, QL, SP, ACA, PV
BREVITAL SOD INJ 2.5GM	5	PA, ST, QL, SP, ACA, PV
BREVITAL SOD INJ 500MG	5	PA, ST, QL, SP, ACA, PV
DIPRIVAN INJ	5	
DIPRIVAN INJ 100MG/ML	5	PV
DIPRIVAN INJ 200/20ML	5	
DIPRIVAN INJ 500/50ML	5	
<i>etomidate iv soln 2 mg/ml</i>	2	ST

### Document Layout Key

Column	Description
Drug Name	Lists the medication name. Generic medications are listed in lowercase, <i>italicized</i> letters. Brand name medications are CAPITALIZED. Separate medication entries are required for some dosage forms such as extended-release and delayed-release.
Drug Tier	Indicates the tier level.
Requirements/Limits	Indicates how the medication is classified or whether any Utilization Management program(s) apply. For instance, SP indicates that the medication is classified as specialty, PV indicates that the medication is considered preventive, and ST notates that step therapy applies for this medication. A full list of abbreviations can be found under the LEGEND section of this document.
